

円周角の定理の計算1

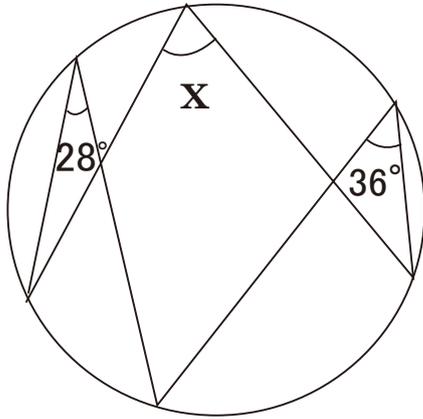

NO. 2

名前

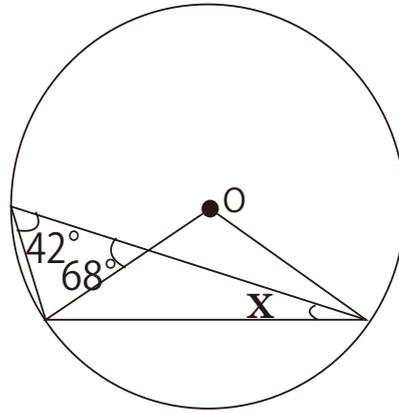

/ 4 点

◆ 下の図で角xの大きさを求めなさい。

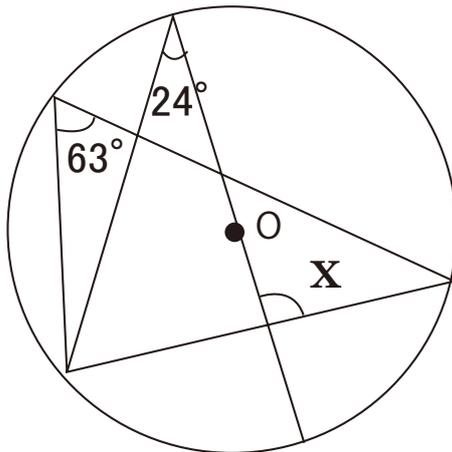

①

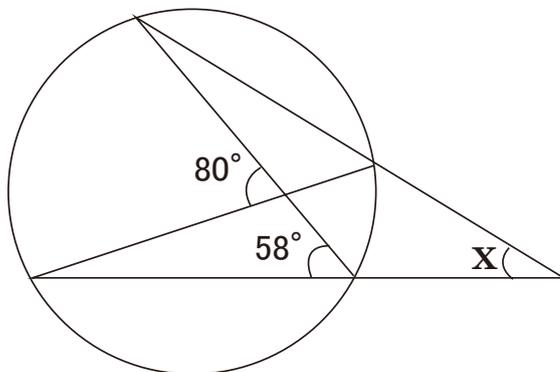

②

③

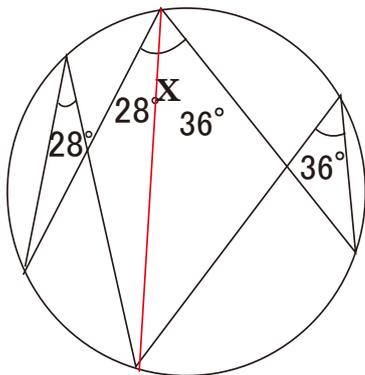

④

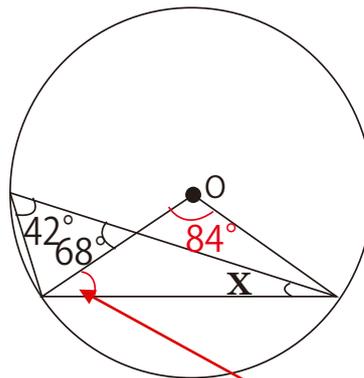

解答

①

$$28 + 36 = \underline{64}^\circ$$

②

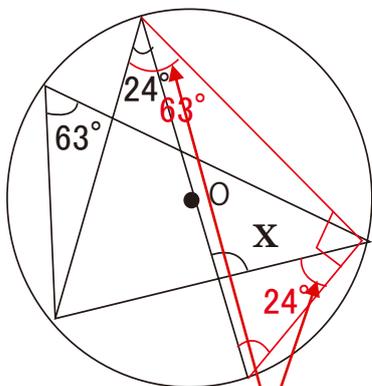

$$42 \times 2 = 84$$

$$(180 - 84) \div 2 = 48^\circ$$

$$68 - 48 = \underline{20}^\circ$$

③

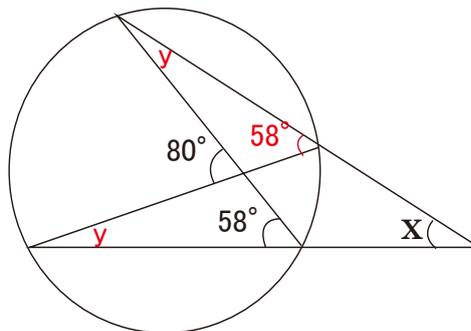

$$63 - 24 = 39^\circ$$

$$90 - 39 = 51^\circ$$

$$24 + 51 = \underline{75}^\circ$$

④

$$y = 80 - 58 = 22^\circ$$

$$58 - 22 = \underline{36}^\circ$$
