◆ 次の計算をなさい。

(1) $(+3) - (+10)$

(2) $(-9) - (-2)$

(3) $(-15) - (+7)$

(4) $(+7) - (-6)$

(5) $0 - (-10)$

(6) $(-6) - (+1.2)$

(7) $(-4.8) - (-2.6)$

(8) $(-\frac{1}{7}) - (-\frac{3}{5})$

(9) $(-\frac{2}{3}) - (+\frac{1}{6})$

(10) $(+\frac{2}{3}) - (-\frac{1}{3})$

解答

$$(1) \quad (+3) + (-10) = -7$$

$$(2) \quad (-9) + (+2) = -7$$

$$(3) \quad (-15) + (-7) = -22$$

$$(4) \quad (+7) + (+6) = +13$$

$$(5) \quad 0 + (+10) = +10$$

$$(6) \quad (-6) + (-1.2) = -7.2$$

$$(7) \quad (-4.8) + (+2.6) = -2.2$$

$$(8) \quad \left(-\frac{5}{35}\right) + \left(+\frac{21}{35}\right) \\ = +\frac{16}{35}$$

$$(9) \quad \left(-\frac{4}{6}\right) + \left(-\frac{1}{6}\right) \\ = -\frac{5}{6}$$

$$(10) \quad \left(+\frac{2}{3}\right) + \left(+\frac{1}{3}\right) \\ = +\frac{3}{3} = +1$$
