

# 一次関数のグラフから式を読み取る1

学習日： \_\_\_\_\_

/ 点

◆ 次のそれぞれの直線の式を求めなさい

## 解答

① 傾き 1  
切片 5

$$y = \frac{x + 5}{1}$$

(2) 傾き 2  
切片 4

$$y = \frac{2x + 4}{1}$$

(3) 傾き  $3 \div 4 = \frac{3}{4}$   
切片 - 3

$$y = \frac{\frac{3}{4}x - 3}{1}$$

(4) 傾き - 2  
切片 2

$$y = \frac{-2x + 2}{1}$$

(5) 傾き  $-2 \div 5 = -\frac{2}{5}$   
切片 2

$$y = \frac{-\frac{2}{5}x + 2}{1}$$

(6) 傾き - 3  
切片 6

$$y = \frac{-3x + 6}{1}$$
